ABOUT

Telecommunications Engineer with 10+ years in software development, specializing in Python backend systems and full-stack web applications. Proven track record building critical enterprise platforms for Telefónica, Inditex, SEAT (Volkswagen Group), and Transport for London. Strong expertise in microservices, data engineering (PySpark, Databricks, Kafka), and cloud infrastructure (AWS, Azure). Exploring AI Engineering with side projects in RAG systems, AI agents, and LLM-powered tools.

EXPERIENCE

GFT Technologies

Nov 2025 – Present

Full Stack Python Developer — Telefónica / Telxius

- Built critical incident management platform with domain-oriented architecture: FastAPI, async SQLAlchemy, PostgreSQL
- Orchestrated integrations with external systems (Team API, Hub, MS Graph) using resilience patterns (retry, circuit breaker)
- Automated notification system with async processing via Celery + Redis; real-time incident tracking
- Implemented multi-provider enterprise auth (LDAP, SAML, JWT); deployed on Kubernetes/OpenShift

FastAPI SQLAlchemy PostgreSQL Redis Celery Angular Docker Kubernetes

GFT Technologies

Sep – Nov 2025

Full Stack Python Developer — Telefónica / Telxius

- Developed scheduled maintenance work portal with FastAPI backend and Angular frontend with notification management

GFT Technologies

Sep 2023 – Sep 2025

Python Developer / Data Engineer — Inditex

- Built microservices architecture with Kafka messaging for product data extraction across Inditex brands
- Developed PySpark ETL pipelines in Azure Databricks; storage with Delta Lake and Snowflake (Iceberg format)
- Managed repos in GitHub and Azure DevOps with CI/CD pipelines

FastAPI PySpark Kafka Databricks Delta Lake Snowflake Iceberg

GFT Technologies

Jul – Sep 2023

Backend Python Developer — Telefónica / Telxius

- Built traffic control and cyberattack mitigation portal with FastAPI and PostgreSQL
- Automated deployment with Docker and Docker Compose

Deep Planet

May 2022 – Jul 2023

Python Engineer

- Refactored and architected Flask API from scratch; process automation with Docker
- Created AWS Lambda functions to expose ML models for crop health analysis and satellite imagery processing
- Managed AWS infrastructure (EC2, Lambda, API Gateway, RDS, S3); supported ML team with data pipelines

Flask AWS Lambda API Gateway S3 RDS Docker

SEAT:CODE (Volkswagen Group)

Dec 2021 – May 2022

Backend Developer — Product & Logistics

- Flask backend for vehicle test report processing; data governance with Kafka and Apache Atlas
- AWS infrastructure management and Elasticsearch integration

Flask Kafka Apache Atlas AWS Elasticsearch Docker

Telefónica Tech

Oct 2019 – Nov 2021

Full Stack Developer — Smart Steps

- Built data analytics web portal from scratch for BI teams: Django/DRF backend, Angular frontend
- Developed Transport for London analytics portal with D3.js/Mapbox for passenger flow optimization
- AWS infrastructure (EC2, Athena) for big data queries; PostgreSQL databases

Django Angular D3.js Mapbox AWS Athena PostgreSQL Docker

// Education

MSc Big Data & Business Analytics
Univ. Europea M. Cervantes
2018 – 2019

Web Dev Master Bootcamp
KeepCoding
2017 – 2018

BSc Telecom Engineering
Univ. Oberta de Catalunya
2011 – 2016

// Languages

Spanish Native

English Professional (FCE)

// AI Side Projects

- CV Talk — AI resume chatbot
- RAG System — ChromaDB + LangChain
- AI Code Converter — Multi-model
- Web Summarizer — GPT-4 mini
- Company RAG Chatbot

EXPERIENCE (CONTINUED)

- **AirON Group (at Telefónica I+D)**
Full Stack Developer — Smart Steps
 - Built analytics dashboard for Transport for London using O2 mobility data with D3.js visualizations
 - Full-stack development with Django/DRF and Angular for Big Data projects on AWS

Jun 2018 – Oct 2019
- **DEIMOS Imaging (UrtheCast)**
Software Engineer & Satellite Ops
 - 8 years in satellite operations: monitoring, telemetry, mission planning for Deimos-1 and Deimos-2
 - Built Copernicus Emergency Imagery portal (Java, Angular) and ground station automation tools (Python, Qt)
 - Coordinated 24/7 on-call response service; RF equipment maintenance and anomaly reporting

Jul 2010 – Jun 2018

KEY ENTERPRISE CLIENTS

- Telefónica / Telxius
- Inditex
- SEAT / Volkswagen
- Transport for London
- Deep Planet
- UrtheCast / Copernicus
